1 (equal)	Runway 16	Runway 27	See Note 1
1 (equal)	Runway 27	Runway 27 & 34	See Note 2
2	Runway 09	Runway 16	See Note 7
3	Runway 27	Runway 27	
4	Runway 34 or 16	Runway 34 or 16	
5	Runway 09	Runway 09	See Note 3

(b) 0600 - 2300 HR local time (high capacity landing modes)

RUNWAY MODE			
PRIORITY	LANDING	TAKE-OFF	NOTES
1 (equal)	Runway 27 & 34 (LAHSO)	Runway 27	See Note 4

(c) 2300 - 0600 HR local time

RUNWAY MODE			
PRIORITY	LANDING	TAKE-OFF	NOTES
1	Runway 16	Runway 27	Except as per Note 5 See also Note 6
2	Runway 27	Runway 27 & 34	See Note 2 & 5
3	Runway 27	Runway 27	
4	Runway 34 or 16	Runway 34 or 16	
5	Runway 09	Runway 09	See Note 3

Notes:

1. Runway 16 take-off permitted for south and east bound routes, subject to traffic by:
 - i. propeller-driven aircraft, the noise emissions from which do not exceed 90EPNdB (eg: DHC8, SF34); or
 - ii. jet aircraft up to B737/A320 size, but only when there is a significant ground delay for a departure from RWY 27.
2. Runway 34 landing is permitted, subject to traffic, for arrivals via the PORTS STAR through south-west to the WENDY STAR.
3. Runway 09 is equal first priority for landing but lowest priority for take-off. Ad-hoc landings on runway 09 may be available when suitable with overall traffic management.
4. High capacity modes may be used during peak arrival periods when significant airborne delays would otherwise occur.
5. Night jet departures: When there are jet departures requiring the longer runway for take-off, priority 2 mode may be nominated by ATC instead of priority 1.
6. Runway 34 landing is permitted, subject to traffic, for arrivals via the WENDY STAR.
7. Not available between 2300-0600 local time.

7 NOV 2019

- 1.2 - Between the hours of 2300 and 0600 local, jet aircraft departing runway 16 must use the full runway length.
- 1.3 - Jet noise abatement climb procedures apply for runways 16 and 09.

2 - PREFERRED FLIGHT PATHS

- 2.1 - The minimum height over densely populated areas is:
- Jet aircraft 5000FT AGL;
- Non-jet aircraft 3000FT AGL;
except where impractical in the normal course of operation to and from the airport runways.
- 2.2 - ATC shall normally process IFR departing aircraft via Standard Instrument Departures. When a departing aircraft is not following a procedural SID, ATC shall process the aircraft via flight paths that approximate relevant SID tracks, where possible, and in compliance with para 2.1.
- 2.3 - IFR arriving aircraft must be processed via STAR tracks (where available), although aircraft may be radar vectored from STAR down-wind or base leg to final approach. Otherwise, STAR tracking may only be varied if essential for sequencing or separation. Non-STAR tracking must comply with para 2.1.
- 2.4 - When RWY 16 is in use:
Aircraft for left base will be tracked via:
i. STAR track via BELTA; or
ii. Visual track for left base to ROKDL; provided that
(a) Aircraft must not be track shortened prior to HORUS waypoint (20 ML) from the LIZZI STAR or VALES waypoint (30 ML) from the BOYSE STAR; or
(b) If separation requires aircraft to be positioned north of the STAR base leg, ATC should route aircraft clear of Wallan township. If avoidance of Wallan is not possible, then overflight by jet aircraft should be at or above 6000FT AMSL whenever practicable.
- 2.5 - When RWY 34 is in use:
(1) Aircraft for right base:
i. Must follow STAR track via Essendon Airport; or
ii. If separation requires, may be RADAR VECTORED south of Essendon Airport to intercept runway centreline.
(2) Aircraft for straight-in approach or left base:
i. Must follow the applicable STAR; or
ii. Between 0600 and 2300 local only, may be RADAR VECTORED to be established on runway centreline not closer than 5 DME ML (3.5 NM from touchdown).
- 2.6 - Between the hours of 2300 and 0600 local, aircraft from the south-east must not proceed west of the ONAGI - MONTY track until MONTY, except that aircraft requiring to land on Runway 09 or 34 may proceed via the PORTS STAR.

3 - TRAINING FLIGHTS

See AIP/ERSA

1 - MELBOURNE-DEPARTING AIRCRAFT

- 1.1 - Whenever possible, complete cockpit checks prior to line-up and keep any checks requiring completion on the runway to a minimum.
- 1.2 - On receipt of line up clearance, taxi into position as soon as possible. Do not backtrack.
- 1.3 - Pilots and ATC should endeavour to keep aircraft moving and avoid a standing start.
- 1.4 - Commence the take off roll as soon as take off clearance is issued.

2 - MELBOURNE-ARRIVING AIRCRAFT

- 2.1 - By day, ATC may use 2400M runway separation between aircraft arriving to Runway 16/34. Both aircraft may occupy the runway during application of the standard.
- 2.2 - By day or night, ATC may use 2.5NM spacing between aircraft arriving to Runway 16/34 and Runway 27. Expect to vacate the runway via the Rapid Exit Taxiways (RETs) specified in the table below.
- 2.3 - To ensure minimum runway occupancy time and support optimum spacing on final, whenever operational conditions permit, expect to vacate the runway via the exit taxiways specified in the table below.
- 2.4 - Plan a predictable and efficient exit from the runway and if an exit other than the preferred is required, advise tower on first contact.
- 2.5 - Landing Exit Distance (LED), the distance from the threshold to the furthest edge of the exit taxiway, are provided to assist planning.

	Aircraft Type	TWY Exits	LED (Metres)
RWY 16	All aircraft	E	1354
		<u>G*</u>	1945
		J	2905
RWY 34	All aircraft	<u>F*</u>	1810
		E	2347
		C	3361
RWY 27	All aircraft Heavy	<u>N*</u>	1630
		M	2286
RWY 09	Turboprop Other aircraft	<u>A</u>	1658
		<u>P</u>	2286
		<u>Q</u>	2286

Note 1: Preferred exits are **bold and underlined**.

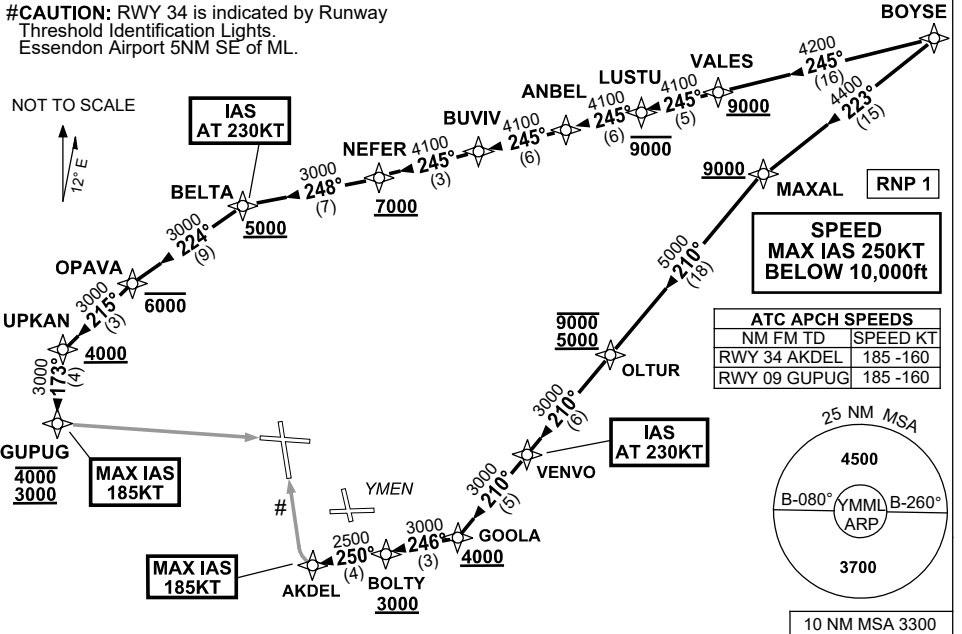

Note 2: * Indicates Rapid Exit Taxiway (RET) and maximum design ground speeds are 53KT (50KT WET)
